

How to make a mummy

Have you ever wondered how to make a mummy. This set of instructions will show you how!

You will need

- Canopic Jars.
- Natron
- Water from the Nile.
- a knife
- Palm oil.

First wash carefully the body with palm wine and water (room temperature) from the river Nile.

Next, you need to take out all of the organs. Don't forget to leave the heart because it is needed later and also you need to take the brain out of the nose! There's a special instrument to do this.

Then, stuff the body and put some of the organs in a jar called a Canopic jar and then the body needs to be in a bath of natron to dry it out.

After 40 days, remove the stuffing and replace it with sawdust of linen and wrap the body in strips of linen cloth

Finally the body needs to be put in a sarcophagus.
